List of Tables

Chapter 2

Table 2−1. Fields in the lpp_name File. . . . . 2−20
Table 2−2. The Table of Contents File. . . . . 2−46

Chapter 3

Table 3−1 Required POWER Instructions . . . . . 3−4
Table 3−2 COMMON MODE Instruction Set . . . . . 3−5
Table 3−3. The _mulh Function. . . . . 3−10
Table 3−4. The _mull Function. . . . . 3−11
Table 3−5. The _divss Function. . . . . 3−11
Table 3−6. The _divus Function. . . . . 3−11
Table 3−7. The _quoss Function. . . . . 3−12
Table 3−8. The _quous Function. . . . . 3−12
Table 3−9. Storage Operand Characteristics. . . . . 3−14
Table 3−10. Alignment for Scalar Types. . . . . 3−15
Table 3−11. Data Alignment Required for Scalar Members of Unions and Structures. . . . . 3−16
Table 3−12. General-Purpose Register Conventions. . . . . 3−20
Table 3−13. Floating-Point Register Conventions. . . . . 3−21
Table 3−14. Special Purpose Register Conventions. . . . . 3−22
Table 3−15. Prolog Actions. . . . . 3−29
Table 3−16. Epilog Actions. . . . . 3−29
Table 3−17. Use of Save/Restore Routines. . . . . 3−35
Table 3−18. GPR and LR Save and Restore Entry Points. . . . . 3−35
Table 3−19. GPR Save and Restore Entry Points. . . . . 3−38
Table 3−20. FPR and LR Save and Restore Entry Points. . . . . 3−40
Table 3−21. FPR Save and Restore Entry Points. . . . . 3−41
Table 3−22. C Data Types. . . . . 3−48
Table 3−23. Application of Argument Passing Rules. . . . . 3−49
Table 3−24. Conventions for One-Byte Signed Integers. . . . . 3−55
Table 3−25. Conventions for One-Byte Unsigned Integers. . . . . 3−55
Table 3−26. Conventions for Two-Byte Signed Integers. . . . . 3−55
Table 3−27. Conventions for Two-Byte Unsigned Integers. . . . . 3−56
Table 3−28. Conventions for Four-Byte Signed Integers. . . . . 3−56
Table 3−29. Conventions for Four-Byte Unsigned Integers. . . . . 3−56
Table 3−30. Conventions for Pointers. . . . . 3−56
Table 3−31. Conventions for Four-Byte Real Numbers. . . . . 3−57
Table 3−32. Conventions for Eight-Byte Real Numbers. . . . . 3−57
Table 3−33. Conventions for Fixed-Length Arrays. . . . . 3−57
Table 3−34. Conventions for Aligned Structures. . . . . 3−58
Table 3−35. Conventions for Arrays of Structures. . . . . 3−58
Table 3−36. Source Language Identifiers. . . . . 3−59
Table 3−37. Type-Encoding Fields. . . . . 3−63

Table 3−38. Canonical Representation of Integers and Characters. . . . . 3−64
Table 3−39. Canonical Representation of Filler in Structures. . . . . 3−66
Table 3−40. Canonical Representation of Alignment. . . . . 3−67
Table 3−41. Canonical Representations from Various Languages. . . . . 3−67
Table 3−42. Examples of Canonical Representations. . . . . 3−69
Table 3−43. Additional Rules for Argument Passing. . . . . 3−70
Table 3−44. Hashes Generated for FORTRAN Statements. . . . . 3−70

Chapter 4

Table 4−1. File Header <filehdr.h> structure. . . . . 4−8
Table 4−2. Auxiliary Header <aouthdr.h> Structure. . . . . 4−10
Table 4−3. Section Header <scnhdr.h> Structure. . . . . 4−13
Table 4−4. Conventional Header Names. . . . . 4−16
Table 4−5. Loader Section Header Structure. . . . . 4−20
Table 4−6. Loader Section External Symbol Table Structure. . . . . 4−21
Table 4−7. Loader Section Relocation Table. . . . . 4−23
Table 4−8. Loader Section Import File IDs — Contains Variable Length Strings. . . . . 4−23
Table 4−9. Loader Section String Table — Contains Variable Length Strings. . . 4−24
Table 4−10. Initial Exception Section Entry for Function. . . . . 4−30
Table 4−11. Subsequent Exception Section Entries for Function. . . . . 4−30
Table 4−12. Relocation Entry Structure. . . . . 4−32
Table 4−13. Initial Line Number Entry for Function. . . . . 4−36
Table 4−14. Subsequent Line Number Entries for Function. . . . . 4−36
Table 4−15. Symbol Table Entry Format. . . . . 4−39
Table 4−16. File Name Auxiliary Entry Format — 18 Bytes. . . . . 4−42
Table 4−17. csect Auxiliary Entry Format. . . . . 4−43
Table 4−18. Function Auxiliary Entry Format. . . . . 4−47
Table 4−19. Table Entry Format. . . . . 4−48
Table 4−20. Section Auxiliary Entry Format. . . . . 4−48
Table 4−21. Symbol Table by Storage Class. . . . . 4−49
Table 4−22. String Table Organization. . . . . 4−52
